

As a listener of Satellite Radio I think it's pretty said that there are people out there trying to take away what we have has a right in this country. I enjoy the right to listen to a station that provides what I'm wanting to hear or not hear. I pay for this pleasure, that to is my right. I travel many miles by car and having the pleasure of XM Radio or any other Satellite Radion network is Great. Being able to tune to a major market and get traffic and weather when you need it is GREAT! Not having to fumble around on the radio dial searching for a station in every market. not having to listen to every stations point of view on everything is really great and not having to listen to all the commericals is even better. I even pay for this right to listen to Satellite Radio, so who am I offending? It would seem that it would be better if the goverment would step back and say competition is Good, you don't like waht they are doing them make your's better. In my eye's all your doing is wasting my tax payer dollars on some needless cry baby venture. stick to the important issues!
